

My Erasmus+ KA171 Experience

Pham Quang Dung - VNUA

An open book with glowing yellow pages is shown at the bottom left. From the pages, a large, swirling trail of white sparks and stars extends upwards and to the right, filling the left half of the image. The background is dark purple.

PhD. Pham Quang Dung

Affiliation: Vietnam National University of Agriculture (VNUA), Faculty of Information Technology.

Location: Gia Lam, Hanoi, VN

Work Experience

2003 ~ present: Lecturer & Researcher

Teaching subjects:

- Computer Networking
- Cybersecurity
- Routing and Switching

My KA171 mobility

WHEN

23-30th May 2025

WHERE

University of Camerino,
Italy

WHAT Activities

- Giving lecture
- Joining seminar
- Visiting labs
- Discussing about collaboration

WHICH Fields

- Computer network technology
- IT and AI applications in agriculture.

Benefits received

For me

- Improved my skills in teaching through blended teaching and learning activities, and the use of LMS system.
- Obtained new knowledge in my field through the discussions with professors, PhD students
- Had a very nice experience about Italian culture and met many kind people.
- Increased my reputation in working environment.

For my university and faculty

- Expanded the possibilities for further cooperation in training and doing research
- Increased the dynamism of my colleagues in international collaborative activities.
- Increased the reputation of my university and my faculty.

Advantages

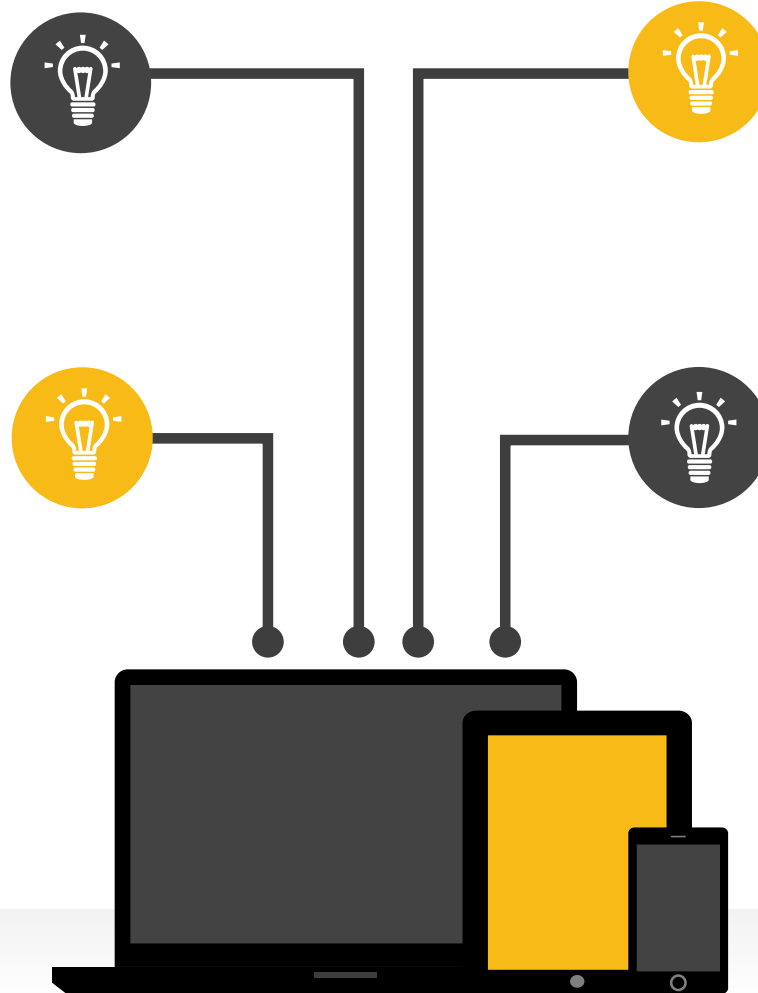

- ✓The enthusiastic assistance of the lecturers and staffs of ItaCentro (HANU), University of Camerino, and VNUA in handling the necessary procedures for the mobility.
- ✓Ms. Thao, Director of ItaCentro, and her colleagues also shared many experiences, connected me with the colleagues from University of Camerino, and guided me in carrying out collaborative activities..
- ✓I have already had experience in living and travelling in Italy as well as in some other Europe countries.

My proposals

Continue and strengthen cooperation activities on projects from Europe to Vietnam through HANU's coordination, as they have proven to be dynamic, effective, and substantive, with many EU and Vietnamese universities actively participating.

Pay attention to cooperation in the field of agriculture, applying ICT and communication to smart agriculture and precision agriculture – with VNUA, which is the leading university in Vietnam in training and research in the field of agriculture.

At the macro level, continuing this cooperation will further improve the relationship between the EU and Vietnam, a rapidly developing country.

At a lower level, it strengthens and expands cooperation between educational institutions in training and research; helping many teachers and students improve their capabilities and better serve the community.

THANK YOU
